WHY BUY THIS FUND?

- ▶ An “all weather” long/short fund with an optimal balance between returns and capital protection
- ▶ Risk-managed exposure to International developed market stocks
- ▶ Targeted returns of 10-12% annualized, with less than market volatility
- ▶ Actively reduces risk during times of market stress
- ▶ Low correlation to traditional asset classes

INVESTMENT PROCESS

The EHP Advantage International Alternative Fund is a diversified, highly liquid, long/short fund that invests in developed international markets (Europe, U.K., Japan and Australia). We use a disciplined, evidence-based process to buy undervalued, rising, stable stocks and short overvalued, declining, volatile stocks. It is intended to be used as an equity or balanced fund replacement that offers better risk-adjusted returns and improved downside protection versus traditional long-only funds.

We use a 3-step process to build the portfolio:

1. We use a disciplined process to buy stocks with attributes that have proven to lead to better future performance and short stocks with attributes that have proven to lead to poor performance. We focus on **Fundamental Value**, **Price Momentum**, and **Volatility** factors when evaluating stocks.
2. We add value through a number of “opportunistic” equity and credit strategies that are uncorrelated with our core long/short equity portfolio.
3. We have unique process to tactically gear down risk in poor markets to protect capital. We reduce long positions, increase shorts and rotate to more defensive strategies with a systematic, disciplined process.

EHP Funds Inc. is the investment manager to the EHP Funds offered under prospectus (collectively, the “Funds”).
