INVESTMENT PROCESS

The EHP Guardian International Alternative Fund is a sector-diversified, low net exposure, long/short fund with an emphasis on quality, dividend paying equities in developed international markets (Europe, U.K., Japan, Australia). It is intended to generate positive absolute returns regardless of market conditions, and offer an uncorrelated alternative to traditional bonds and stocks.

We use a 3-step process to build the portfolio:

1. We use a disciplined process to buy stocks with attributes that have proven to lead to better future performance and short stocks with attributes that have proven to lead to poor performance. We focus on **Fundamental Value**, **Price Momentum**, and **Volatility** factors when evaluating stocks.
2. We add value through a number of “opportunistic” equity and credit strategies that are uncorrelated with our core long/short equity portfolio.
3. We have unique process to tactically gear down risk in poor markets to protect capital. We reduce long positions, increase shorts and rotate to more defensive strategies with a systematic, disciplined process.
